
Darkness Daylight Lights Shadows New York

light - prime junta - direct light makes its way onto the film straight from the emitter. this happens when the light source is actually in the frame: the sun, moon, stars, a lamp, a fire, a candle... **key concept positions of the sun and moon affect earth.** - shadows in space cause eclipses. sunlight streams past earth and the moon, lighting one side of each body. beyond each body is a long, thin cone of darkness where no
